Strong points

- A specific and reliable software solution
- Ergonomic configuration and installation
- User training
- E-support: responsive online assistance
- Development Partnerships with our clients
- Advanced optional modules
- Regular updates

About us

LBS has been producing software since 2002. Created for the exclusive requirements of a translation company owned by the same group, LBS quickly earned its independence. The decision to sell the LBS Suite product to the entire translation market was a natural progression. LBS Suite became an independent product specifically dedicated to companies in the sector.
Over time, it adapted to the requirements of its client companies. Today a fine-tuned CRM + ERP solution, LBS Suite has successfully won over highly renowned translation agencies and other major translation groups, in particular thanks to its user-friendly operation and intuitive interface.

Development Partnership

LBS Suite is a software designed and adapted for translation agencies. Our R&D department is constantly programming improvements and innovations. We are open to your new ideas and functionalities.
Your suggestions are investigated as a priority and whenever possible they are integrated into our development schedule. We enjoy complete interactivity with our clients.
With LBS Suite, you are no longer merely a customer. You are a full partner and your opinion is very important to our developers.

Your ideas may appear in the next update, ready for you to use!

Build your own LBS Suite

CUSTOMISATION

LBS SUITE INTEGRATES YOUR ENVIRONMENT

With LBS Suite, changing tools means changing your life! And you can keep your identity and your marks!

- Choose the modules that meet your needs.
- Personalise the names of your client services.
- Add languages or translation topics.
- Customise client and supplier prices to match different criteria.
- Configure the content of the automatically generated e-mails you send to clients and suppliers.
- Choose your images (logo, colour, pictures) for the client and supplier portals and for invoices and quotes.
  LBS Suite will reproduce them in your colours.
- Configure the folder organisation on your server for your files (source, client-ready, glossaries, translation memories, etc.) and let LBS Suite automatically generate the folders for each project and client file.
